

### Two Stage Pressure Reducing Tank

We are a manufacturer in China supplying a wide range of DFTT® Two Stage Pressure Reducing Tank. Our products are different from other similar products. Two Stage Pressure Reducing Tank is cost-effective, safe and reliable. It is processed with top-quality raw materials. Under such strict production conditions, Secondary Pressure Relief Box for Medical Treatment is still in stock, and there is no supply chain break, which shows our seriousness. Therefore, Two Stage Pressure Reducing Tank has many foreign buyers, and we have established a good relationship with them. I hope you can make me your long-term partner in China.

## Product Description

DFTT® **Two Stage Pressure Reducing Tank** is made by steel plate, with excellent quality and exquisite workmanship, which can meet the individual needs of customers. While playing its own role, it does not affect each other. Two Stage Pressure Reducing Tank integrates modern technology and adopts professional design. Due to its small and beautiful size, it is favored by customers who like small and delicate products.

### Product Parameter

Product name	Shape	material	size	color
